

NEW MODEL

FORMOSA GRT425

COMPACT Aquatic Weaponry™

Innovation is at the core of Formosa Marine, highlighted by the launch of the GRT range. This new compact model brings Formosa's signature toughness, stability, and ride quality back to the small boat market, setting it apart from typical Australian production boats. With 4mm 5083 high-tensile bottom sheets, 4mm plate sides, and fully welded top decks, the GRT range outperforms standard pressed and stitched tinnies. Its V-hull, wide beam, and reverse chine provide strength, stability, and performance. High sides, ample internal freeboard, and smart storage make the GRT an affordable, easy-to-handle choice for anglers.
